EDUCATION

Queen's University

Sept 2020 - Present

Bachelor of Computing Science (Honors)

- GPA: 4.1 out of 4.3
- Awards: Queen's University Excellence Scholarship, Dean's Honor List (2021 - 2024)
- Active participation in Queen's game development club, game jams, and hackathons

WORK EXPERIENCE

Queen's University

Jan 2023 – May 2024

Teacher Assistant (Computer Systems, Quality Assurance, Algorithms)

Kingston, ON

- As an Assistant to multiple Professors, I hosted tutorial workshops and online office hours, communicated with fellow students and analyzed solutions for feedback.
 - Courses span multiple fields, from C programming to Agile development to algorithms
- Workshops - Led weekly workshops, facilitating communication between students and teaching concepts.
- Feedback - Wrote extensive tips and comments on student work in areas of code functionality, Agile practices, and algorithm efficiency.

MAJOR SCHOOL PROJECTS

Project CCASM (Canadian Soil and Microbe Database and Web Interface)

Sept 2023 – May 2024

Team Member, Front end, Backend

Kingston, ON

- Main developer for three pages (Request, Deposit, and Login) and an alert system, allowing users to request and deposit bacterial samples to and from the database, while allowing admins to be notified of user requests and to securely login in. Helped teammates in deployment and database setup throughout the 8 months.
 - Made use of Python, Django, MySQL for backend, with Angular, JavaScript, HTML, CSS for frontend, Docker for deployment

Quality Assurance Scrum Project

Sept 2023 – Jan 2023

Team Member, Coder

Kingston, ON

- Participated in a 4-month long school course simulating a professional scrum environment.
 - Python, Flask, MySQL, Pytest, Selenium, GitHub Action
 - Developed and performed extensive quality assurance testing on an Airbnb website
 - Gained insight into agile processes in terms of scrum meetings, development, testing and deployment

Dark Wave

Jan 2023 – May 2023

Team Member, Coder, Leader

Kingston, ON

- Designed and developed a term long 2d Unity game focused on darkness with a team of 3. Assumed a leadership role at weekly meetings, ensuring consistent progress and resulting in an excellent project mark (95+).

OTHER EXPERIENCES

QHacks Hackathon

Feb, 2024

Leader, Main coder

- 2-day Hackathon focused on AI.
- Python, TensorFlow
- Main coder and leader for a deep learning machine learning system which estimated the probability of pneumonia given a chest X-ray image.

Personal Work

- Coded many self-learning projects throughout the past 3 years for hands-on experience and better understanding of different programming languages and systems.

SKILLS

Python, Java, JavaScript, TypeScript, ExpressJS, C++, C, Django, Flask, Angular, HTML, CSS, Unity, C#, Docker
MySQL, GitHub, Git, Linux, Agile, Scrum

Data Structures, Algorithms

Teamwork, Leadership, Self-Learner, Self-Driven, Initiative, Adaptability, Critical thinking, Active Learning, Listening
